

Student Medications & Immunizations

If your child had approval for medication to be administered during the school day this past school year, please remember that a new medication form will need to be filled out for the coming school year. The Perrysburg Schools Medication Policy requires that a new medication form be filled out for each school year for medication that **must** be given during the school day. If your decision is to continue this plan for the 2020-2021 school year, a new Perrysburg Schools medication form needs to be completed by the licensed prescriber and the parent/guardian. The form is linked here: <https://files.neola.com/perrysburg-oh/search/forms/fm5330F1.pdf>. When completed, it can be mailed to or dropped off at your child's school building office after August 3, 2020. Please label: **Attention: Clinic Staff**.

Careful planning now will help in the transition to the new school year and accommodate any medication adjustments that may have taken place over the summer.

Also, please note, in accordance with the Ohio Revised Code 3313.713 and Perrysburg Schools Medication Guidelines, **only a parent, guardian or other adult** may bring medication, in the original container, to the school building for the clinic. **No children may bring medication to school.** Self-administer as needed medication, except for asthma inhalers, epinephrine injectors/acute allergy medications and insulin, must be stored in a locked cabinet in the clinic. **Please also note that if a student will be self-carrying a dose of epinephrine for allergic reactions, state law requires that we have a back-up dose in the clinic as well.**

Immunizations

Just a reminder that all incoming Kindergarteners, 7th graders and 12th graders are required to have the state-mandated vaccinations by the start of the school year as listed below. Please make sure you are getting those immunizations completed over summer break as well.

- **Kindergarten** - complete immunization requirements and physicals
- **7th Grade** - documentation of a Tdap and a meningitis (quadrivalent - A,C,W,Y) vaccine
- **12th Grade** - documentation of having had a meningitis (quadrivalent - A,C,W,Y) vaccine on or after their 16th birthday
- **All New Students to the School District** - documentation of complete immunization requirements

For more information, please view the U.S. Department of Health and Human Services Centers for Disease Control and Prevention's "Recommended Immunization Schedule for Children and Adolescents Aged 18 Years or Younger" here: <https://www.cdc.gov/vaccines/schedules/downloads/child/0-18yrs-combined-schedule-bw.pdf>

Healthy Regards,
Debbie Reddick, RN
